

Name _____

You have been given 3 main ideas for the topic of seasons. Fill in important details for each idea.

Reasons for Seasons

Seasons are caused by the tilt of the Earth, the shape of the Earth, and the Earth's revolution around the Sun. These change the amount of energy that hits the Earth.

The Earth is tilted on its axis,

The Earth is spherical in shape.

The Earth revolves around the Sun.

The difference in the amount of energy received by different parts of the Earth is important because: _____
