

ThinkQuest

WHAT TO DO:

Go to this website:  <http://tqjunior.thinkquest.org/3804/>

1. On the first page of the website you will find this:

2. Click on **Length**
 - a. Read the information provided for you.
 - b. You will find a place to make conversions. Convert 27 cm to feet. Record your answer on the data sheet.
 - c. Make up at least 3 other conversions. Show the conversions on your answer sheet.
 - d. Go back to the main page: [Return to Main Page](#)
3. Click on **Volume**. Describe how to find the volume of an odd shaped solid on your answer sheet.
4. Go to **Mass**. Convert 123 kg to g. Record on your answer sheet. Do at least 3 other conversions.
5. Go to **Temperature**. Write a definition for temperature in your own words.
6. Go to **Time**. If it is 9:00am in the Central Time Zone, what time would it be in Fiji? In Moscow? In Islamabad? Record on your answer sheet.
